

# Lawn Care made easy!

## ...for Centipede Lawns

### Step #1

#### Apply February

Contains the pre-emergent Dimension, designed to control crabgrass and many other annual grass and broadleaf weeds before they come up. Can also be safely used in ornamental landscape beds around trees and shrubs. Apply and water thoroughly.

### Step #2

#### Apply April through May \*

A complete lawn food plus a weed killer to get rid of those pesky spring broadleaf weeds. Apply to damp grass then water deeply after 24 hours. For complete weed control apply **ferti-lome Weed-Free Zone** 10-14 days later.

\*if weeds are not a problem ..... use

### Step #3

#### Apply June through August

"Super" greening power. A specifically formulated lawn food with vital trace elements like *iron* and long-lasting trogen to keep your lawn green all summer. Apply & water thoroughly.

### Step #4

#### Apply October

Contains the pre-emergent Dimension, designed to control annual grass and broadleaf weeds before they come up. Can also be safely used in ornamental landscape beds around trees and shrubs. Apply and water thoroughly.

### Step #5

#### Apply Mid December

Contains "Team", a pre-emergent weed control, designed to control poa-anna (annual bluegrass), a weed common in this area. Apply around Christmas and water thoroughly.
